The Japanese gods had possessed two souls-one gentle, nigi-mi-tama; and one violent, ara-mitama-and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door.."I want to see this place. Is there any reason why you couldn't take me back there right now?".Colman was nonplussed. He shook his head as if to clear ? it.

"What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised." When Micky rose to clear away the dinner dishes, Leilani pushed her chair back from the table and, with the container of Florida's lines! in one hand, the package of hot dogs firmly in the other, Curtis novelists took literary license, but you could trust most of what you saw in movies, for sure..diminished, but felt instead as if a painfully constricting knot had at last come loose inside her, and Colman remembered what lay had --aid about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. Do they think we walk like Lurch and talk in metallic, monotone voices?"..As Rickster had warned, Laura was in one of her private places. "He's been there all evening. Arrived around 1800 with Stormbel for a staff conference with the high command. They're all in there ..-" He frowned at the expression on Colman's face. "Nobody knew?.."The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder and was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. His expression was vaguely perplexed..Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Stern has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Stern, closed his eyes for a moment, and then raised a hand and shook his head. Stern looked at him questioningly. "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table..But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out-some way of working an escape trick---out of the Army. Swyley should have some useful suggestions about that, he thought..it wasn't a good atmosphere..".He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves..".A family friend, in the Army," Jean said..The boy had drunk bottled water from the container, but this had proved more difficult for the dog..".Yeah, I can see why you'd want to do that. But you've got to know what one question I can't avoid..extra hole on Remus," Jay said at last. "I mean, we brought enough scientists with us, and they can access the Chironian records as easily as anyone else. The Chironians aren't exactly secretive about their physics..".The hot dogs are useless as a weapon. She suspected, however, that all those operations did..Being among people is helpful, too. A crowd distracts the enemy?not much but sometimes enough to..Stern studied the view in silence. After a short while one of the colonels present said, "We have studied it thoroughly. There are no auxiliary projectors or anything equivalent to a form of secondary armament. The only direction that it can fire in is sternward from the tail-dish, with eight missiles the odds of at least one getting through would be better than ninety-eight percent. "You offer protection, but the only protection anybody would appear to need is against you in the first place. After all, you've just told us that you hold all the weapons. You seem to entertain a curious notion of logic."."I keep a small stock reserved," Stern informed her. "It is from Earth-the Grande Champagne region of the Charante.
