The hillside below the post fell steeply away, its features becoming rapidly indistinct in the feeble starlight before vanishing completely into the featureless black of the gorge beneath. There was no moon, and the sky was clear as crystal. When his eyes had adjusted to the gloom, Colman shifted his attention to the nearer ground and methodically scanned the area in which the twenty-five men of the platoon had been concealed and motionless for the past three hours. If they had undercut their foxholes and weapons pits the way he had shown them and made proper use of the rocks and vegetation, they would stand a good chance of escaping detection. To confuse the enemy's tactical plots further, D Company had deployed thermal decoys a half mile back and higher up near the crest, where, by all the accepted principles, it would have made more sense for the platoon to have positioned itself. Auto timed to turn on and off in a random sequence to simulate movement, the decoys had been drawing sporadic fire for much of the night while the platoon had drawn none, which seemed to say something about the value of "the book" as rewritten by Staff Sergeant Colman. "There are two ways to do anything," he told the recruits. "The Army way and the wrong way. There isn't any other way. He was the president of a company that bore his name and which held more than a hundred patents in the scientific instrument field. He was sixty, a widower. His only daughter and her husband had been killed in a plane crash in 1978. He had a partner who handled the business operations now; Smith spent most of his time in his own lab. In the spring of 1990 he was working on an image-intensification device that was puzzling because it was too good. He had it on his bench now, aimed at a deep shadow box across the room; at the back of the box was a card ruled with black, green, red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow box; the light reflected from the card did not even register on his meter, and yet the image in the screen of his device was sharp and bright When he varied the inputs to the components in a certain way, the bright image vanished and was replaced by shadows, like the ghost of another image. He had monitored every television channel, had shielded the device against radio frequencies, and the ghosts remained. Increasing the illumination did not make them clearer. They were vaguely rectilinear shapes without any coherent pattern. Occasionally a moving blur traveled slowly across them..them, she looked just like an ancient centurion in a movie about the Roman Empire..I'm sure she thought he was an imp from hell. I almost died. Fm not sure what was wrong. Apart, we.I am fortunate in that, unlike Hollywood, F&SF seems to be largely immune from trends. The magazine has a reputation for offering variety, and to uphold that image, it seems to me that it must carefully avoid trends and formulas in an effort to publish a balance of different types of fantasy and sf. And so we continue to look for good writing and fresh ideas and entertaining narratives, and once those general criteria are satisfied, we take on whatever seems to be pleasing our writers at the time. That's the best way I know of pleasing our leaders..?Marc Russell
