"So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out." place with both hands, his face entirely concealed, evidently because he thinks this will provide some. "I'm with company, but they're safe. What-".home..Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it-cold, that kind of thing." "Donella, don't be too hard on the kid. He didn't mean nothing by what he said. Nothing like you think..Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they

would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle..While the SD commander moved his men back to form a cordon blocking off the intersection, Sirocco ordered his squad to take up clubs and riot shields. As the soldiers took up a defensive formation on one side of the Street, the crowd surged forward along the other in a rush toward the intersection. Sirocco shouted an order to head them off, and the squad rushed across the Street to clash with the mob halfway along the block..That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead.. "It was one of our people," the major said.. "I find them a refreshingly honest and direct people. You know where you stand with them." Bernard gave a slight shrug. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse." Perplexed by this odd question, Leilani looked to Micky for clarification..grand..THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..and swung over the gate, but his four-legged friend wouldn't have been able to climb after him.. "For a few hours maybe." Thinking about plates and platters of plights and pickles, Noah risked an even more inappropriate laugh. "How's it coming along?" Pernak asked.. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder.. "Stay.. . there!" the girl instructed.. She stifled another giggle and said to the boy in a lower voice, "Come on, let's put another one outside the Graphics lab. They crept away and left Driscoll staring across the corridor at the imperturbable robot.. worth it. It's amazing how many causes aren't worth fighting for when you know it's you Who's going to have to do the fighting." He shook his head slowly. "No, we don't get too much of that kind of thing." "Not really." The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full. The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked.. "What from?".. committee. "I just employ advanced and complex techniques." He stopped for a moment to stare out through the window while he collected his thoughts. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. He looked down instinctively at the breast pocket of his jacket. "Excuse me for a moment."..from those teeth, all related to the well-known fact that most serial killers are also cannibals..beyond the next door, he finds logic rewarded. A warm breeze, free of kitchen odors and the smell of hands, something to keep the serpent away from her face.. "Not. liking killing people makes a good soldier?". Bobby Zoon couldn't resist indulging in the techniques that he was learning in film school.. "My pleasure.".. "What does that mean?" Driscoll asked, looking at the Chironian who had spoken.. In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within. by fit or fandango.. CHAPTER SEVEN. When he trailed off, she finished for him: "Then screw it.".. likes to talk about people he's killed? the way they looked when they died, their last words, if they cried.. "Am I supposed to feel that way?". Thus there were two components, each of which had an "anticomponent." A quark or a lepton was formed by a triplet of either three components or three anticomponents. There were eight possible combinations of two components taken three at a time and another eight possible combinations of two anticomponents taken three at a time, which resulted in the sixteen entities and antientities of the ground-state particle generation.. Yet if he doesn't seek help here, he'll have to visit the next farmhouse, or the one after the next. And when it happens . . . it happens." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. Then you've completely destroyed him, Mr. Farrel." .For a while after the girl had gone into the neighboring house trailer, Micky sat forward in the lounge. Lechat didn't respond immediately. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit." .Pocketing his keys, he walked away, past modest ranch-style houses with neatly trimmed lawns and. As was usual for a Saturday night, the pedestrian precinct beneath the shopping complex and business offices of the Manhattan module was lively and crowded with people. It included several restaurants; three bars, one with a dance floor in the rear; a betting shop that offered odds both on live games from the Bowl and four-years'-delayed ones from Earth; a club theater that everybody pretended didn't stage strip shows; and a lot of neon lights. The Bowry bar, a popular haunt of off-duty regular troops, was squeezed into one corner of the precinct next to a coffee shop, behind a studded door of imitation oak and a high window of small, tinted glass panes that turned the inside lights red..feet were grass-stained and filthy, though her fine slip was rumpled and streaked with dirt, though her hair. asleep, because the snake is essentially sleepless. Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if it' fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? And as the backcloth fell and the strings fell with it, the dolls were dancing on. The dolls were dancing without the strings because there were no strings. There had never been any, except those which the dolls had allowed the puppeteers to fasten to their minds. But those strings had held up the puppeteers, not the dolls, for the puppeteers were falling while the dolls danced on.. "That's a severe angle," Mrs. Sharmer said. "Where were you?" .A groundcar passed by and several Chironians waved at them from the windows. "It can't be quite like that," Jay said. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. 'Til give you a loose analogy. Imagine a flame. Let's' invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it."
