But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again..Stanislau touched in some commands, and immediately all references to C Company were replaced by references to D Company. Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislau promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions.. "And you're a cop." Wellesley seemed thoughtful. "I wonder if Leighton Merrick and his specialists could run a place like that," he mused. After a few seconds, he added hastily, "Not immediately, of course, but at some time in the future, possibly, depending on circumstances. As insurance, it would certainly pay us to know something more about it." piercing directness, and said almost in a

I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves..". "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives..". If Death had pockets in his robe, they smelled like this filthy carpet. Nauseating waves of righteous anger. Stern nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaultz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?". "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..These are not rich people, and he feels guilty about taking their money. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron..also left with a vague uneasiness. Like a quick dark fish, some disturbing half-glimpsed truth had seemed. They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. If she harbored anger, she hid it. another, and they most likely are who they appear to be. There's always the chance, however, that they. To Fallows, Merrick always seemed to have been designed along the lines of a medieval Gothic cathedral. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had

once been in there had withered and died without anyone's noticing.. "Yes, we know that," Quarrey agreed. "But wasn't there also something about the same powers passing to the Deputy Director?" "I think it will be all right if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out." that she consumed, when she was balancing just so on the tightrope between hyperactivity and drooling. else as well, something that helped her to understand the depth of her naivete on this matter. Her smile. The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it.. Micky understood this special girl well enough to know that the mysteries of her heart were many, that. "We-we never believed that story," Bernard said weakly.. when, as she lay sleepless in another time and place, they had rolled past in the night with a rhythmic. Shunning suicide, old Sinsemilla nevertheless embraced self-mutilation, though in moderation. A short silence fell while they both thought about the same thing. "How long do you think it'll be?" Colman asked at last.. She felt diminished, humiliated, shaken? no less afraid than she'd been a moment ago, but now for. Angry murmurs were heard from the Terran civilians.. "Catalysts," Colman said after a few seconds of reflection. "You know, you're fight, now that I think about it. All they do is make you exercise the brains you never ' knew you had." Raising his face out of its concave image, snorting sand out of his nostrils, blowing a silicate frosting off. "Who's Colman?" Lechat inquired.. "A dinner guest?" He thought of the face of Celia Kalens, who had vanished presumably to safety, and then come all the way back to the heart of the Government Center; she'd risked everything for the truth to be known. Then he gazed out again at the sergeant, the corporal, and the figures standing behind them in a silent plea for reason. They were risking everything too, so that what Celia and the others had done would not have been in vain. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out-some way of working an escape trick--out of the Army. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too.".. In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along.. Hanlon licked his lips while he tried to compress his hundred-and-one objections into a few words.
