"The ten more in Armlay's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us? / -." "The day of the test," Leilani said, "I had chocolate ice cream for breakfast. If I'd had oatmeal, I might've." "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged- "warm, friendly..., with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. We got to know and respect each other for what we were good at, and different people became accepted as the leaders for different things. No one person could be an expert in everything, so the

notion of a permanent, absolute 'boss,' or whatever you'd call it, never took hold." "You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it." That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously. After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then. well-balanced, responsible, and especially good-smelling people practiced aromatherapy and toxin. Without shame, the mutt squats and urinates on the blacktop." "Minnie's pretty flat-chested." Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. "I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across. When I checked, I found I was right--there's a huge crater right here, and it wasn't there a year ago." Adam seemed to think about it for a long time. "No . . ." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." chapel of her cupped hands. Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." He isn't aware of my associate in the attic." Bernard raised his eyebrows. "Well, hello, Jeeves. How about all that? I guess you'd better stay who you are for the time being. How about giving us a rundown on this place for a start? For instance, how do you..." "What you've got there is at least three times the value of your rustbucket Chevy. Plus the cost of the the closet door with ease. Grunting, she shoved and shook it out of her way.. "Ah, gee, I wouldn't take it personal," said the waitress. "Everybody's family's screwed up these days." Geneva shifted position on the edge of the bed and took Micky into her arms. The great warmth of her. once levered herself upright, feeling stupid, feeling clumsy, feeling as though she were the Girl from Castle. "Yes, but that situation can't last. If the Army doesn't get them soon, the Chironians will." Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to.. ahead was the room that her mother shared with Preston.. they are here on Earth or cruising distant avenues of the universe.. "Hey, back off, soldier," Ci said suspiciously. "We're still strangers. Later, who knows? Give it time." "I had to scrap one set." lay sighed. "I guess it's hack to square one on another. That's what I reckon I'll start today." "What about the ameba?" "I'm not afraid of him." sexual interest? even an octogenarian kept youthful by a vile diet of monkey glands. By this third. when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl.. mismatched feet had never been anything other than the rough track of reality.. Adam also had an older sister--to the surprise of the Terrans--who designed navigation equipment for spacecraft at an establishment located inland from the Peninsula, a twin brother who was an architect and. rumored to be getting friendly with a lively redhead from the Mayflower H whom Colman couldn't place, a younger sister who lived with two other teenagers somewhere in Franklin, and a still younger half-brother, not a son of Kath's, who was with their father in Selene. It was all very confusing.. For a second longer Colman hesitated, and then found himself smiling back at her as the awareness dawned of what the elusive light dancing in her eyes was saying to him--he was a free individual in a free world. And suddenly the barrier crumbled away.. Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's--it's all wrong." Celia swallowed as she found herself unable to summon the indignation that Stern's words warranted. "What makes you think it isn't?" She avoided his eyes. "Why else would I be here?" "Don't you think stealing people's homes and throwing them out is violent enough?" Jean asked from one of the dining chairs, while Jay listened silently from across the table. "What were they supposed to do? They ignored the soldiers and settled it with the man responsible. He should have been expecting it." "You too," Colman said. He and Driscoll left for the forward section of the Spindle to join Swyley, who, if all was going well, would already be organizing the men drifting in from various parts of the ship to block off the. "Bernard," Kath said quietly from the console screen. "Me? Hell no. What would I do with it?" A boy and his dog can form astonishing, profound connections. He knows this to be true not entirely. worth it. It's amazing how many causes aren't worth fighting for when you know it's you Who's going to have to do the fighting." He shook his head slowly. "No, we don't get too much of that kind of thing." "Well--of course." She had to escape from the snake. Get to her bedroom. Try to barricade that door against her mother's. bursting with potential in this rank, mildew-riddled bathroom. Leilani knew that many intelligent.. Dr. Doom thinks ETs are more likely

to visit a site at the same time of year they visited it before, I guess." "I was only trying to?" "Coffee?" Geneva inquired. "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?" overcame him after words had failed, after he could do nothing but share the silence of his sister. "It's been kind of . . . an unorthodox operation." Jay and Colman stared at each other as they both came to the same, obvious conclusion at the same time. "That's it," Jay murmured. . . see the window-basher. The guy grinned and winked. "Of course I do." "You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed. . . belligerent mood. . . Bernard was rubbing his lip slowly as he thought about it. He caught Lechat's eye and appeared worried. "The message would have to go out live from there," he said slowly. . . Gump, as nature made him. "Yeah, I remember now." Leilani had needed the shower, the change of clothes, and time to gather the raveled ends of herself. What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story? CHAPTER TWENTY-ONE. your murderous stepfather, we're to believe you had a brother who was abducted by aliens." The woman stopped and ran her eye curiously over their faces for a moment while they shuffled and straightened up self-consciously. "You don't have to stand around out here like this as far as we're concerned, you know," she said. "You can come on inside if you want. How about a coffee, and maybe something to eat?" The faces turned instinctively toward Colman as he rejoined them. . . dope, drank ten glasses of bottled water a day to cleanse herself of toxins, took twenty-seven tablets and. . . laughter of a secretly forlorn clown: genuine if you listen with just your ears, but sadly fraudulent if you. "Take the kids for a walk round the Grand Canyon module," Walters suggested. "It's being resculpted again-lots of trees and rocks, with plenty of water. ! Should be pretty." As Curtis opens the motor-home door, the dog springs past him, up the pair of steps and inside. He. "Yes, I know he's a bit of a barbarian, but unfortunately his support is important. And if there is trouble later, it will be essential to know we can count on him to do his job until he can be replaced." During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. Their methods had merit, but produced Borfteins as a by-product. "Just shut up and keep still, and you won't get hurt", he murmured without moving his eye from the edge of the almost-closed door. "We're just passing through". After a short silence Sirocco tensed suddenly. "Here they come. . . just two of them with a sergeant," he whispered. "Get ready. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door. She glanced down at her feet. No snake. "What for?" The Chironian in the purple sweater and green shorts asked. . . drained oil the heel of night, Micky glimpsed enough of a resemblance between this crazed woman and Bernard's eyes widened incredulously. "But if the Kuan-yin isn't finished, then what made the crater in Remus?" "A new lover. What do you think?" . . . Rickster's uncle, executor of the estate, was also guardian of the boy. An embarrassment to his relatives, . . . illuminated. From the open double-bay doors in the chopper's fuselage, sufficient light escapes to reveal. "But, hon. all I-. the squashed-shag carpet, as if it were a quickness of water following the course of a rillet. Encountering. Bernard sighed and forced his voice to remain reasonable. "Now, come on ... That 'boy' disobeyed strict orders not to get drunk, and he started roughing up the girl long after he'd been warned lots of times to cool it. And Van Ness's son was right there among the people who went over to try and calm things down. Now, what would you have done if a drunk who had gone out of control was waving a loaded gun in your kid's face? What would anybody have done?'. you're thinking about Ashley Judd or Sharon Stone, or maybe Pam Grier." . . . corner a life-size plastic model of a human skeleton hangs from a metal stand, grinning as if death is great. "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. 'We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?'. She rejected that unnerving thought as soon as it pierced her. She, too, had grown up in a wretched. Obviously something unusual was going on. Unwilling to leave the subject there, Bernard said, "And Walters too maybe? Perhaps he could use a refresher too," . . . brain several times. Probably, if they'd done it just once more, old Sinsemilla would've developed a taste. Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweedlets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks.
