She was introspective, outgoing. The image that so held his attention was transmitted from an eighteen-inch-long, infantry reconnaissance that they had managed to slip in a thousand feet above the floor of the gorge and almost over the enemy's forward positions and was supplemented by additional data collected from satellite and other ELINT network sources. The display showed the target command bunker at the bottom of the gorge, known enemy weapons emplacements as computed from backplots of radar-tracked shell trajectories, and the locations of observation and fire command posts from source analysis triangulations of stray reflections from control lasers. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred. When Columbine had finally run the gamut of all her feelings, which included fear, anger, joy, pain, and an abiding and entirely unreasoning sense of dread, she thanked him, gave him her address and phone number, and said to get hi touch in January for his endorsement. variations, would have identical genetic equipment (This would raise serious ethical questions, as all. In the audience was my good friend of three decades? the well-known science fiction writer, boo vivant, and wit, Randall Garrett Out of the corner of my eye, I noticed a piece of paper placed on the podium as I talked about cloning. I glanced at the paper without quite halting my speech (not easy, but it can be done, given the experience of three decades of public speaking) and saw two things at once. First, it was one of Randall's superlative pieces of satiric verse, "Like hell! Like bloody God-damned hell! Where are they? In these cases, an egg cell, containing only a half set of chromosomes, does not require union with a sperm cell to supply the other half set. Instead, the egg cell's half set merely duplicates itself, producing a full set, all from the female parent, and the egg then proceeds to divide and become an independent organism, again a kind of clone. There would be practical uses, too. A prize bull or a champion egg-laying hen could be cloned, and the genetic characteristics that make the record-breaking aspects of the animal possible would be preserved without the chance of diminution by the interplay of genes obtained from a second parent. Crawford missed most of the interesting work, being more suited for the semiskilled manual labor that never seemed to be finished. So he and Lang had to learn about the new discoveries at the nightly briefings in the shelter. He remembered nothing about any animal life being discovered, and so when he saw something crawling through the whirligig garden, he dropped everything and started over to it. across the clearing, through the trees and into the open space before the riverbank. "It's a very little thing to thank me for," Amos said. "But we had better start back if we want to be at. He watched the disaster unfold before his eyes, silent except for the rhythmic beat of the alarm bell in his ears. The dome was dancing and straining, trying to fly.
